

Level Sensors Conductive Types VN, VNY, VPC, VPP

CARLO GAVAZZI

- 1 to 4 electrodes
- Isolated or unisolated electrodes
- Cable or screw connection
- 1/2", 1" or 1 1/2" pipe thread

Product Description

Level sensor for measuring the level of conductive liquids, i.e. max./min. control of charging or discharging. The function is determined by

the amplifier relay used. The sensors are delivered with standard length electrodes - these are cut off to suit the application.

Mode of Operation

The length of the electrodes determines the levels which will be detected and the amplifier chosen determines

the function (see SV..., S195/196, S1961, ELA, ELC or ELD). If the container is made of a conductive mate-

rial this can be used as common electrode.
