

No-Rust® rust preventive and inhibitor No. 40212

- Non-silicone/non-wax
- Neutralizes fingerprint acids
- Self cleaning

The one-step rust preventive that contains both neutralizer and rust preventive. Ideal for plastic mold protection. Works on stamping dies, stripper plates, jigs and fixtures, rubber mold dies, die casting dies, precision instruments, machine tools and machined or ground steel of all kinds. Guarantees positive protection by displacing moisture from metal surfaces. Adheres tightly. Accurate spray pattern concentrates protection in normally inaccessible crevices. Protects up to five years under normal conditions.

NOTICE TO PURCHASER: User shall determine suitability of product for his intended use and assumes all risk and liability in connection herewith.
