

### **Econo-Spray® Pin Lube & Grease industrial lubricant No.46011T**

- Contains rust and oxidant inhibitors
- NLGI Grade #2 grease
- No methylene chloride
- No Chlorofluorocarbons (CFC's)

Econo-Spray(R) Pin Lube & Grease is a white lithium grease that protects equipment by reducing the friction and sticking that can cause pre-mature wear and hinder productivity. It can be used on metals, glass, some plastics and rubbers and more. Pin Lube and Grease is ideal for knock-out pins where part marking could be a problem. It can be used on all moving parts such as slides or cams, stripper plates, guide pins, etc. or any place where binding, galling and seizing can occur. A heavy-duty grease, it is water resistant, protects against corrosion and works at a wide range of temperatures.

NOTICE TO PURCHASER: User shall determine suitability of product for his intended use and assumes all risk and liability in connection herewith.
