

Hi-Temp 1800 mold release agent No. 44110

- Paintable
- Non-silicone
- Contains Boron Nitride

Ideal for the latest high-temperature resins. It is also excellent for die-casting metals, as an anti-splatter coating for welding applications, and for a coating and lubricant to aid with the easy removal of cartridge heaters and barrel nozzle tips.

NOTICE TO PURCHASER: User shall determine suitability of product for his intended use and assumes all risk and liability in connection herewith.
