

Pure Eze mold release agent No. 45712N

- An excellent all-purpose mold release agent
- Neutral white-oil-based release
- Paintable
- Non-silicone
- Non-lecithin
- Won't turn color or turn rancid

Use with all thermoplastic resins, polyolefins, polycarbonates, rubber and some epoxies. Pure Eze mold release is a white oil-based release that is ideal for medical and food applications. Because it is formulated with a highly refined mineral oil, it is colorless, odorless, tasteless and will not change color over time.

NOTICE TO PURCHASER: User shall determine suitability of product for his intended use and assumes all risk and liability in connection herewith.
