

Water Soluble mold release agent No. 41212N

- Non-silicone paintable
- No ozone depleting chemicals
- Permits ultrasonic welding of parts
- No removal necessary, simply wash parts in H₂O
- Does not contain water

Water Soluble release permits complete cleaning of molded parts. In most cases this release need not be removed prior to painting, hot-stamping or plating. Antistatic properties reduce dirt pick-up on molded parts.

NOTICE TO PURCHASER: User shall determine suitability of product for his intended use and assumes all risk and liability in connection herewith.
