April 22nd, 2021 - Earth Day

Good for You. Good for the environment.

Increasingly, businesses around the world are responding to a global imperative and consumer demand to go green. **And more than 80% of people respect companies and brands that adopt eco-friendly practices**, according to an international survey.

As manufacturers we all need to do our part, big or small, to facilitate the most effective method for the disposal of our industries waste.

AceTronic has partnered with GREENTEC to bring you our AceGreen Controller Swap Program.

We invite you to join us in doing your part to foster a circular economy, finding uses for our industries waste and reducing the amount that goes to landfill or worse, sent in a container to a distant location for disposal. **We all need to be accountable for the waste we generate. Locally, domestically and nationally.**

Little by little we can all make a difference.

Our SWAP program is a small program, but for us, it makes a BIG difference.

Go Green - Recycle your Controller

AceGreen Controller Swap Program

Recycle & Save

when you return your old controller to us for disposal,
we take care of dismantling & recycling the materials,
...and we're **both** doing our part to go green.
