

AceCare No.4

News for right now...

COMMUNICATING NEWS YOU NEED TO KNOW NOW...

AceCare is our way of reaching out to you with the latest news as it relates to our industry in these uncertain times.

We will use this forum to tell you about products, features, and news from us, and our suppliers as it pertains to our industry during the outbreak.

Clean and disinfect all hard-surfaces in combination with good hand-washing.

It is not yet known how long the virus causing COVID-19 lives on surfaces, however, early evidence suggests it can **live on objects and surfaces from a few hours to days.**

Surfaces frequently touched with hands are most likely to be contaminated. These touch-points include doorknobs, handrails, elevator buttons, light switches, cabinet handles, faucet handles, tables, counter-tops and electronics (cellphones, office equipment).

For this reason, you need to routinely clean and disinfect all hard-surfaces in combination with personal hand hygiene. Hand sanitizers alone will not decrease the spread of the virus. Therefore, in addition to hand sanitizers, use a DIN approved disinfectant on all touch-points to ensure hard-surfaces are disinfected/sanitized.

For disinfecting hard surfaces, use only approved hard-surface disinfectants that have a Drug Identification Number (DIN). A DIN is an 8-digit number given by Health Canada that confirms the disinfectant product is approved and safe for use in Canada. *

Clean - Disinfect - Sanitize Ultra-Lyte® DIN Certified

An environmentally friendly but extremely potent antimicrobial solution capable of rapid destruction of bacteria, viruses, spores, scale, and biofilm. Replaces all current sanitizing products while being entirely safe to use. **Read DIN-Ultralyte certification.**

BUY ULTRA-LYTE

Non-medical face masks can help prevent spread of COVID-19, Canada's top doctor says*

*Reference : **Toronto Star Article**

"Dr. Theresa Tam, Canada's chief public health officer, now says Canadians can consider wearing non-medical, or homemade masks if they are in situations where they cannot avoid close contact with people, such as on public transit or out buying groceries."

Non Medical Masks in the Warehouse

Non medical grade masks can be worn in a factory /warehouse environment to avoid droplets from your nose and mouth, contaminating the air/surfaces around you and also to prevent you from touching your mouth and nose with your hands. The specifications of filtration and liquid permeability are much higher for Medical grade masks.

- BFE - 95% (Bacterial Filtration Efficiency)
- 5 per package.
