

COMMUNICATING NEWS YOU NEED TO KNOW NOW...

AceCare is our way of reaching out to you with the latest news as it relates to our industry in these uncertain times.

We will use this forum to tell you about products, features, and news from us, and our suppliers as it pertains to our industry during the outbreak.

Disinfection and Sanitization Station

Many of you are looking to implement the necessary changes to ensure that all employees feel comfortable in their new work environment.

- Installing shields where operators are in close proximity to one another
- changing the layouts of lunchrooms
- regular wiping down of hi-touch areas
- ensuring social distancing protocols

According to a recent discussion hosted by the **APMA, COVID-19 Back to Work Guidance**, there may be a requirement for each operator to have in their possession.. masks, gloves, glasses (in some cases), spray bottles of disinfectant/sanitizer.

Some Tier 1 facilities are looking at the possibility of **offsetting up a central location for the filling and cleaning of spray bottles, for disinfectant**. At the end of each shift the bottles could be either dropped off or gathered and sent to the central area where they would in turn be wiped down and refilled in preparation for the next shift.

Introducing the Ultra-Lyte 1250L Tote

The 1250L Ultra-Lyte Tote is a non-alcohol based product so there is no worry with regards to the storage of a large tote, as there are no flammability concerns. This process will help to limit the number of bottles being used, which ultimately reduces waste.

The totes can be refilled and reused*

*No other product should have been transferred into tote.

Clean - Disinfect - Sanitize **Ultra-Lyte® DIN Certified**

An environmentally friendly but extremely potent antimicrobial solution capable of rapid destruction of bacteria, viruses, spores, scale, and biofilm. Replaces all current sanitizing products while being entirely safe to use. **Read DIN-Ultralyte certification.**

BUY ULTRA-LYTE
