

HURRICANE ULTRA FOGGER

HURRICANE
ULTRA™

HURRICANE ULTRA™

Electric Portable Aerosol Applicator
(ULV / Mister)

Dispenses Both Oil and Water-based Products

The Hurricane Ultra™ is ideal for use in spraying industrial, residential areas, public transit vehicles, including buses, warehouses, sanitation, germicidal spraying and disease control programs are just a few of the markets where the HURRICANE ULTRA™ is used.

- Rugged design handles corrosive liquids and heavy impacts.
- Solid brass metering valve for delivering precise outputs and maximizing use of chemicals
- Low profile tank design virtually eliminates tipping... empty or full!
- Droplet sizes can be controlled for both ULV spraying and residual spraying.

MODELS

Model 2794 Hurricane Ultra 110 Volt

SPECIFICATIONS

Adjustable Flow Rate:	0-4.5 gal/hr, or 0-17 liters/hr.
Particle size:	5-50 microns (MMD)
Tank Capacity:	1 gallon (3.8 liters).
Length:	12 in or 30.48 cm.
Width:	12 in or 30.48 cm.
Height:	14 in or 35.6 cm
Weight (Empty):	6.6 lbs. or 3 kg

INPUT POWER:

Models 2790, 2738: 110/120 volt AC, 6.5 Amps, 50/60 Hz

SHIPPING DATA:

L x W x H: 16.25 x 12.5 x 16.5 (in) or 41.3 x 31.75 x 41.91 (cm)

Weight: 10 lbs. or 4.5 kg

Volume: 1.9 Cu. Ft or 0.05 cu. M.

Some commonly sprayed solutions are:

- Insecticides
- Disinfectants
- Deodorizers
- Fungicides
- Odor Neutralizers
- Water (Humidification)

HURRICANE ULTRA FOGGER FAQ

1. Where is the Hurricane Ultra Fogger made?

Made in the USA from parts sourced globally, the Hurricane's rugged German design is based on the Pulsejet engine. Its solid stainless steel metering valve is built to deliver precise outputs and maximize use of product.

2. How large of an area can I treat?

This depends on several factors including ceiling height, room configuration, fogger setting, and airflow (both natural and HVAC).

3. How do you use the Hurricane Ultra Fogger?

Start fogging immediately inside the designated space so that the Ultra-Lyte encounters the pathogens before the technicians do.

Point the fogger at the furthest upper corner of the ceiling and turn it on.

In a standard 15'x15' office you would direct the fog into each of these four "upper" corners until you create a fog canopy.

4. What setting should I have the Hurricane Ultra Fogger on?

Setting 3-4 will give you the 10-20-micron sized droplets that help you create an environmental spray/fog canopy that will then slowly descend to the floor covering all those hard to access spots where bacteria and viruses are often located.

5. How much fogging is TOO much?

Since Ultra-Lyte/hypochlorous is safe there is no chemical harm. We have our technicians fog each corner of a typical office until they see the fog "billow" without seeing drips coming down the wall.

6. Is Ultra-Lyte safe to use on various surfaces?

Ultra-Lyte is as safe as water, so if you wouldn't soak something with water, don't soak it with Ultra-Lyte...if you wouldn't leave a puddle of water on a surface, don't leave a puddle of Ultra-Lyte on that surface. Fogging Ultra-Lyte will put a micro layer of disinfectant on every surface which will kill any bacteria/viruses it touches and then will evaporate.

7. How do I maintain my Hurricane Ultra Fogger?

Generally, the Fogger requires little maintenance.

Keep your fogger and air filter clean. After using, drain and rinse tank and run fogger head a minute or two to clear remaining liquid from internal lines – this answer came from our research into foggers.

8. What about warranty service?

One year warranty on parts & labour.

9. Where can I go for service?

Call your AceTronic consultant.

10. Do you offer a Fogging Service?

Yes. Contact your AceTronic consultant.
