ECO-PRO 360

The Eco-friendly system designed to keep water from ruining your processes

Safe use for:

- **Mold Cooling lines**
- **Heat Exchangers**
- **Thermolators**
- **Chill Rolls**
- **Chill Rails**
- **Feed Sections**
- **Heater Bands**
- **Heater Jackets**

SAFELY REMOVES

Calcium

Rust

Silica

Manganese

Contaminants

FROM YOUR WATER SUPPLY

Works without electricity!

Eco-Pro features an air diaphragm pump. Works perfectly with in-house air compressor units. Eliminates downstream ruptures.

Works in combination with **AceComplete Descaler**

When used with the EcoPro Cleaning System, **AceComplete** effectively descales heat exchangers, chillers, condensers, pumps, cooling towers, boilers, tubes, pipes, and any water-contact equipment.

Together, they clean equipment without expensive disassembly while eliminating the need for intensive labor.

FAST ACTING & COST EFFECTIVE:

Fortified with wetting and penetrating agents to dissolve deposits into solution, **AceComplete** is a fast-acting industrial descaler and is cost-effective.

SAFE TO HANDLE:

The descaling solution can be safely handled by personnel and circulated through equipment or system without arduous and costly dismantling.

EASY DISPOSAL:

The solution's biodegradability for easy and safe disposal in normal plant sewers, most cleaning applications can be completed within a few hours,

AceComplete biodegradable descaler is designed to penetrate and remove encrusted lime scale, rust, dirt and corrosion by-products from water-wetted internal surfaces of commercial and industrial processing equipment.

It is non-toxic, non-hazardous and biodegradable making it safe for personnel, equipment and our environment.

AceComplete descales:

- **Heat Exchangers**
- **Condensers**
- **Pumps**
- **Thermolators**
- **Chill Rolls**
- **Chill Rails**
- **Feed Sections**
- **Heater Bands**
- **Heater Jackets**
